

RTG 1976 Lecture series: Cofactors

Summer semester 2018, Wednesdays, 11 - 12, seminar room R00080 Otto-Krayer-House.

Date	Name	Title
18.04.2018	Müller	Diversity of cofactor-dependent enzymes – ‘promiscuity’ as the rule, not the exception
25.04.2018	Teufel	The role of N5-oxygen adducts in flavin biochemistry
02.05.2018	Einsle	Tba
09.05.2018	Günther	Theoretical models for the identification of inhibitors of your target protein
16.05.2018	Jung	Drug discovery and chemical biology in the field of cofactor dependent enzymes
30.05.2018	Friedrich	The versatile functions of Fe/S clusters
06.06.2018	Schleicher	Riboflavin - Biosynthesis, Production and Chemical Reactivity
13.06.2018	Lüdeke	Binding of the NAD(P)H cofactor in alcohol dehydrogenases.
20.06.2018	Hunte	Tba
27.06.2018	Boll	Flavin-based electron bifurcation
04.07.2018	Andrade	Tba
11.07.2018	Bechthold	Tba
18.07.2018	Andexer	SAM – the Enzymes’ Swiss Army Knife
