

RTG 1976 Lecture series: Methods and Concepts

Summer semester 2019, Wednesdays, 11 (c.t.) - 12, HS 00003C, Hermann-Herder-Str. 9.

Date	Name	Title
24.04.2019	R. Teufel	Methods to study the interactions of O ₂ with proteins and cofactors
08.05.2019	O. Einsle	Tba
15.05.2019	C. Hunte	Cofactor-mediated electron transfer in cellular respiration
22.05.2019	S. Günther	Computational based methods in drug discovery
29.05.2019	G. Layer	Tetrapyrroles - Biological functions and characterization methods
05.06.2019	S. Weber	Methods to study paramagnetic intermediates
19.06.2019	A. Bechthold	Methods to investigate regulation of natural product production
26.06.2019	S. Andrade	Tba
03.07.2019	M. Boll	The biological Birch reduction of aromatics rings: nature's enzyme cofactor solutions for an 'impossible' reaction
10.07.2019	T. Friedrich	Tba
17.07.2019	M. Müller	"In honour of Richard Finn (and Clive G. Jones): "Natural products - a simple model to explain chemical diversity""
24.07.2019	J. Andexer	tba
